NEXT-GENERATION PASSENGER TRANSPORTATION SAAS

Transform Your Bus Fleet Into a High-Margin Digital Machine

Dhan-Gaadi empowers private bus operators, travel agencies, and state roadways with an autonomous cloud booking engine: authentic Indian RHD seat layout, instant zero-fee UPI QR payments, verified conductor credentials, and real-time OpenStreetMap telemetry.

0%	₹0	100%	24 Hr
Ticket Commission Keep 100% Fare	GPS Hardware Cost Save ₹13,100 / bus	Anti-Theft QR Zero Cash Leakage	Turnkey Launch Custom Domain/App

CORE CAPABILITIES BUILT FOR INDIA:

- ✓ **Indian RHD Compliant:** Driver cabin positioned strictly on the right, entry door on the left.
- ✓ **Direct Bank UPI:** Instant passenger payments straight to your Merchant VPA with 0% gateway cuts.
- ✓ **Mobile-as-GPS Beacon:** Conductor's phone updates bus radar every 5s over high-speed WebSockets.

💰 FINANCIAL LEAKAGE VS MAXIMUM PROFITABILITY

Why Private Bus Operators Lose Over ₹4.5 Lakhs Every Year

A side-by-side comparison of legacy third-party aggregators versus running on your own Dhan-Gaadi cloud platform.

❌ The Old Way (Aggregators & Hardware Traps)

- ✕ **8% to 15% Aggregator Commission:** redBus / OTAs siphon ₹30,000 to ₹50,000/month per bus directly from your ticket revenue.
- ✕ **₹3,500/Bus GPS Hardware Traps:** Expensive AIS-140 tracking boxes require installation, wiring repairs, and ongoing ₹300/mo SIM recharges.
- ✕ **10%–20% Conductor Cash Theft:** Unpunched tickets, pocketed cash fares, and offline seat allotment lead to massive daily revenue leakage.
- ✕ **Frustrating Passenger Phone Calls:** Booking counters receive 50+ anxious calls per day asking *"Bhaiya bus kahan pahunchi?"* wasting staff time.

Total Average Loss: ₹38,000 – ₹55,000 per bus, per month in lost commission & stolen fares.

⚡ The Dhan-Gaadi SaaS Advantage (Your Own Brand)

- ✓ **0% Ticket Commission:** You pay a simple, flat monthly SaaS fee. Every single rupee paid by passengers lands directly into your bank account via UPI.
- ✓ **₹0 GPS Hardware Cost:** Turn the conductor's existing Android phone into an ultra-precise GPS beacon. Zero installation, zero wiring, zero SIM costs.
- ✓ **Zero Cash Pilferage with Digital QR:** Every ticket has an encrypted QR code and assigned conductor name/photo, enforcing strict digital audit trails.
- ✓ **Live Radar ETA on OpenStreetMap:** Passengers track the bus in real time on their phones, with automated stop alerts and conductor WhatsApp contact.

Net Fleet Advantage: A 5-bus fleet saves **over ₹4,20,000 per year** while establishing their own brand identity.

💡 **The Math is Irrefutable:** Just **ONE** bus selling 25 online tickets recovers your entire monthly Dhan-Gaadi subscription fee in just **7 days!**

10× ANNUAL ROI

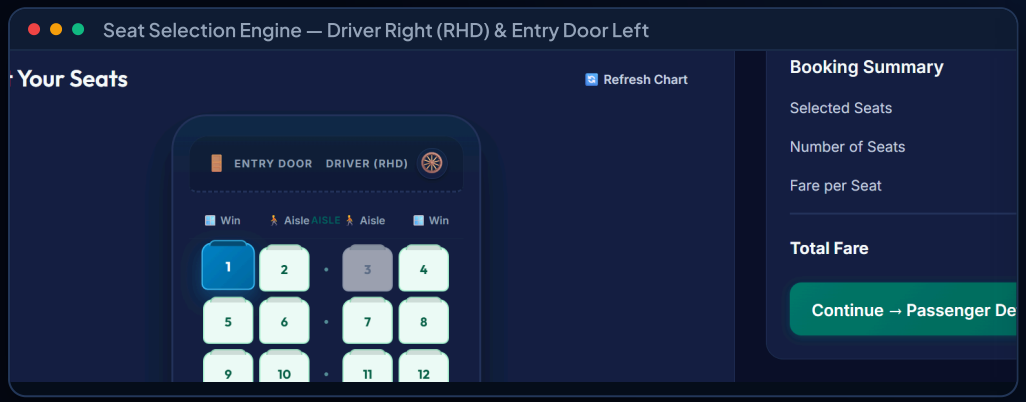

IN DESIGNED STRICTLY FOR INDIAN HIGHWAY SPECIFICATIONS

Indian RHD Layout, Real-Time Seat Lock & Direct UPI QR

A frictionless 60-second mobile booking experience engineered for 100% conversion on Indian networks.

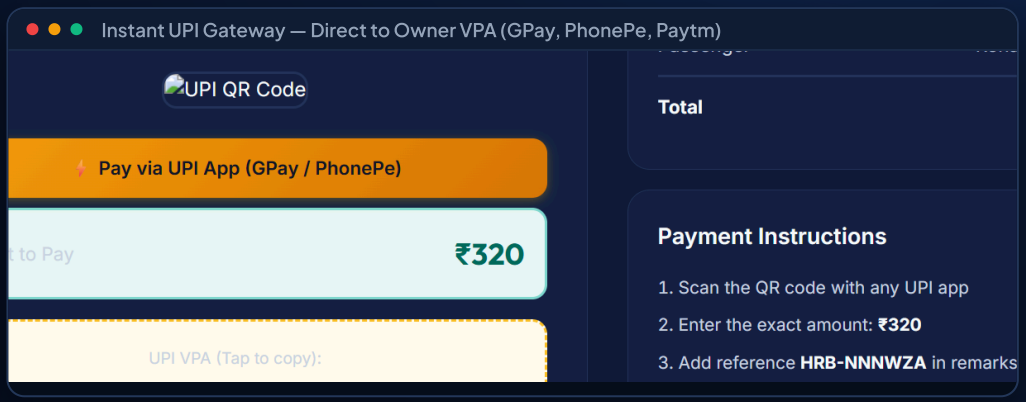

1. Authentic Indian Bus Seat Architecture

Driver on Right (RHD)

2. Direct UPI QR Payment Gateway

0% MDR Commission

- ✓ **True Indian Orientation:** Driver cabin on the right, passenger entry door on the left, matching AIS-052 bus body code.
- ✓ **Multiple Configurations:** 2+2 Luxury, 2+3 Standard, Lower/Upper Sleeper berths, and Semi-Sleeper formats.
- ✓ **Active Seat Lock:** Selected seats are locked with a 10-minute countdown timer to prevent double-booking conflicts.

- ✓ **Direct Bank Settlement:** Payments route directly to the operator's merchant VPA/bank account with zero mediator holds.
- ✓ **Automated UTR Match:** Passenger enters their 12-digit UPI reference number for instant automated ticket clearance.
- ✓ **Zero Hardware Gateway Cost:** No expensive POS swipe machines required; 100% digital QR transaction flow.

FIELD MOBILITY & TRANSPARENCY

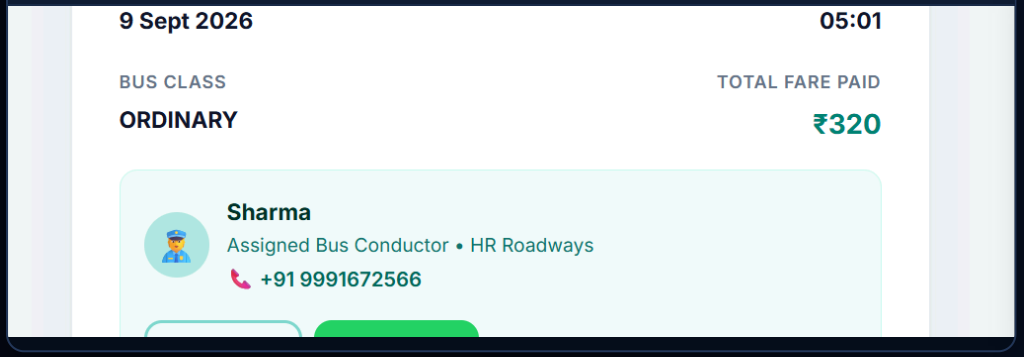

Verified Conductor Trust Card, Anti-Counterfeit QR & Radar

Transforming passenger confidence with assigned crew identity while streaming live OpenStreetMap bus telematics.

1. Conductor Trust Badge & Boarding Pass

Tamper-Proof QR

Verified e-Boarding Pass with Assigned Conductor Card

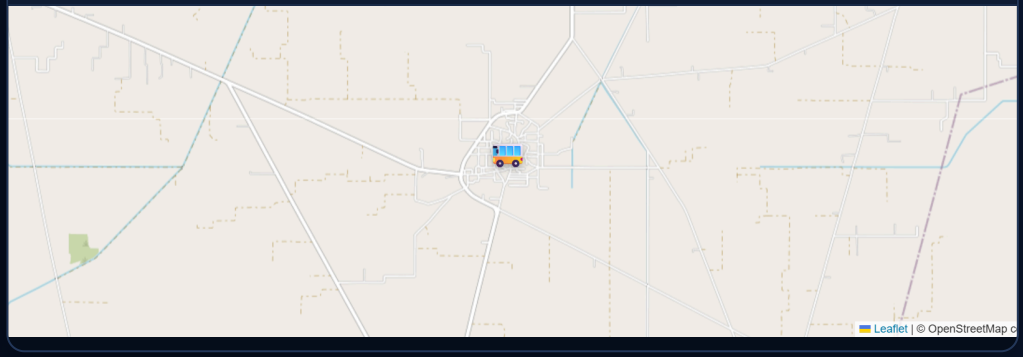

- ✓ **Direct Crew Identity:** Displays assigned conductor photo, verified name, phone number, and 1-tap Call & WhatsApp.
- ✓ **Dynamic Anti-Theft QR:** Scannable exclusively by the conductor's POS mobile app; renders counterfeit screenshots useless.
- ✓ **58mm Thermal Print Support:** Conductor can print physical thermal receipts on portable Bluetooth printers on the move.

2. Real-Time Bus Telemetry & Radar HUD

5-Second WebSocket Updates

Live Highway Radar — Speed HUD & Route Geofence

- ✓ **No GPS Hardware Required:** Conductor's Android phone transmits coordinates in real time via lightweight WebSockets.
- ✓ **Speed & Route HUD:** Displays real-time speed in km/h, next boarding station arrival countdown, and route trail.
- ✓ **Zero Passenger Inquiries:** Live tracking URL sent via SMS/WhatsApp eliminates booking counter phone clutter entirely.

Bluetooth Thermal POS Ready | 1-Tap Conductor Direct Connect | 100% Free OpenStreetMap Integration

ENTERPRISE CLOUD FOUNDATION

One Master Cloud Engine: Hosting 100+ Fleets Seamlessly

Zero server management overhead. Multi-tenant routing gives each operator their own branded domain with total data isolation.

Multi-Tenant Architecture Flow

Instead of deploying fragile, separate Node.js servers for each bus operator, Dhan-Gaadi runs a **Single Multi-Tenant Core** that dynamically serves customized portals based on domain:

`sharmabus.in`	➔ Auto-loads Sharma's Branding, Routes & UPI QR
`yadavtravels.com`	➔ Auto-loads Yadav's Schedules, Buses & Staff
`royal.dhangadi.in`	➔ Turnkey Subdomain for Starter bus owners

- ✓ **Host 500+ Operators on 1 Server:** Uses just 2 Node.js slots on Hostinger (1 Backend + 1 Frontend), leaving 3 slots free.
- ✓ **Instant Global Updates:** Deploy a feature or security patch once; all operators get it instantly without code duplication.
- ✓ **Strict Data Isolation:** Every database query is bounded by `operatorId` partitions. cryptographic

Fleet Capacity & Database Upgrade Path

Tier / Spec	Active Buses	Daily Bookings	Infra Cost
Atlas M0 (Free) Shared 512MB RAM	3 to 8 Buses	~1,500 / day	₹0 / month
Atlas M10 (Pro) 2GB Dedicated RAM	50 to 100 Buses	~25,000 / day	~₹2,400 / mo
Atlas M30 (Cluster) 8GB RAM HA Replica	300+ Buses	~150,000 / day	~₹9,500 / mo

2.1 MB / hr	< 150ms	99.9%
Conductor 4G Data Usage	Ticket Generation Latency	Uptime SLA Guarantee

TURNKEY 24-HOUR CLIENT ONBOARDING:

1. Route Setup: Input stops & fares ➔ **2. Crew Accounts:** Download POS app ➔ **3. Go Live:** Accept bookings

🔒 **Automated Nightly Backups:** Point-in-time recovery & SSL renewal

100% Hostinger VPS Ready

🔒 Cryptographic Tenant Partitioning 🚀 Node.js High-Throughput Cluster ☁ 100% Hostinger & Atlas Compatible

💼 100% TRANSPARENT PRICING • ZERO HIDDEN COMMISSIONS

Commercial Packages: One-Time Setup + Predictable SaaS

Select the exact operational tier that fits your fleet. No percentage commissions—keep 100% of your ticket revenue forever.
